

# THE TEAM TO TRANSFORM YOUR MEDICAL PRACTICE

## Growing the value of your business

At **CMH Practice Management**, we work alongside medical practices to offer a complete business management service, freeing up your time to do what you do best – deliver professional high-quality care in your community.

We find that many GP practice owners don't consider their established practice as a business opportunity structured

toward equity and growth. We understand this mind-frame as it can seem overwhelming managing the day-to-day business requirements in the medical space without the dedicated staff, management, infrastructure, and processes in play.

At CMH Practice Management we live and breathe every aspect of a medical practice. We take

the complexity of tasks out of your hands, saving you time, money, while focusing on making a profit and creating equity growth for the owners of the business.

In doing so, we offer a unique, complete service that includes not only finance but also operational management, human resources, marketing and IT server management.

“At the end of the day, every single thing we do, the products we have in play, exist for one reason only: to help medical practices grow.”

Ian Lowe, CEO, CMH Practice Management

### HERE'S HOW OUR MANAGED SERVICES WORK FOR YOU...

#### Information & Technology

Hosted in a secure ISO facility we manage your PMS installation, system updates, integrations with 3rd parties and ensure the highest levels of up time.

#### Financial Services

We manage your budgeting, accounts payable & receivable, payroll, Medicare submissions, tax, BAS PIP and doctors' payments.

#### Marketing & Communications

Build your brand through integrated clinical campaigns and engagement in your community.

#### HR & Employee Management

Human resource management as well as on site services and accreditation compliance.

**AHGP**

**HELP**

#### Software and Apps

We include Clinimetrix for medical analytics and AHGP for video tele-health, After Hours and direct billing of patients.
